

Surge Suppression Warranty Info

\$25,000/occurrence \$1500/each item for both the meter collar and point of use plug-in devices.

Meter Collar Warranty covers common household appliances not including the water heater. The heat pump is included if the surge travels through the meter collar and then causes damage to the heat pump. CVEC will remove the meter collar and return to Sycom for testing and verification and Sycom will notify the customer directly. Sycom will repair or replace the surge suppression that was sacrificed. Microchip and electronic components of major appliances are included in the warranty.
